

Maintaining Continuous Data Streams on Video Editing Systems

As the field of digital video editing grows, larger system storage volumes are needed to accommodate the high demand for saving and accessing large-sized files. O&O Defrag V8.0 ensures a consistent data stream by optimizing storage volumes, making the video editing process more efficient and easier.

The Problem

Despite the use of high-end workstations for video editing, losses of data through disruption in data streams still occur. Further analysis of this issue inevitably leads to problems related to hard disk. Such data loss is common on heavily fragmented hard disks due to the high probability of failure on the part of the overworked read/write heads.

The Solution

By using a professional defragmentation solution the issue of disk fragmentation can be effectively neutralized, leading to more data stream stability. With O&O Defrag V8.0 Professional Edition users or system administrators can defragment hard disks during regular system operation and without any reduction in system performance, thanks to O&O ActivityGuardPro technology. Defragmentation can be configured and run manually or on a scheduled basis. For video editing systems, O&O recommends both the STEALTH or SPACE defragmentation methods.

The Product

The new O&O Defrag V8.0 Professional Edition for Windows unlocks the hidden Performance of your computer. This software optimizes your hard disk in Windows XP Home, Windows XP Professional, Windows 2000 Professional, and Windows NT 4 Workstation, securely repacking fragmented files together for more efficiency. In addition, O&O Defrag V8.0 Professional Edition boasts outstanding usability and a myriad of important functions not found in any other defragmentation software platforms on the market today.

O&O Defrag V8.0 responds to the specific

needs of users, from its self-configuring O&O OneButtonDefrag to its multiple finely-tuned optimization strategies everything users have come to expect from the market leader in the field of hard disk optimization. The new O&O OneButtonDefrag technology allows O&O Defrag V8.0 to define the defragmentation settings based on the specific needs of each individual computer.

Purchase Options
