

Returning Leased Machines Sale or Disposal of Old Hardware

Leasing companies or companies managing the resale of old company hardware do not always ensure the secure deletion of sensitive company data. Most of the time, hard disks are formatted, leaving the data openly restorable with any one of the many data recovery products on the market. With O&O SafeErase V2.0, a company can securely and easily delete entire systems.

The Problem

When PCs, laptops, or servers, are returned at the end of a lease period, the hard disks are generally formatted to delete any and all data left on the machines. A short time later, those data, that were believed to be destroyed, reappear on the internet or in the hands of a competitor. This can also occur when old hardware is resold to new users or donated to public institutions.

The Solution

By today's data recovery standards, the simple formatting of a data storage volume is not enough to ensure the secure deletion of data. A professional deletion program can overwrite data multiple times and thus reduce this risk dramatically. With O&O SafeErase V2.0 it is possible to delete an entire system directly from Windows by overwriting its data multiple times on all of the connected storage volumes. Ensuring that the restoration of old data is no longer possible, data can be overwritten up to 35 times.

The Product

O&O SafeErase does not simply delete your files; it annihilates them using the approved and recommended methods. These methods include the Gutmann method, and those recommended by the BSI and NSA. With O&O SafeErase even hackers and data spies cannot restore your safely erased e-mails, internet histories, file caches, financial data, company information, and private files. And with the new O&O TotalErase feature now available in

version 2.0, it is possible to delete your entire computer system with the touch of a button. If Windows NT, Windows 2000, or Windows XP is your operating system, you can now prevent unauthorized

Purchasing Options

O&O SafeErase V2.0 is available in single and volume license variations. Updates from older versions or competing products are also available. By purchasing an O&O Maintenance Agreement for O&O SafeErase V2.0 and remaining up-to-date with the newest versions of the O&O SafeErase software, users can make the unpredictable nature of software upgrades and support a thing of the past.
